Dropped Nucleus

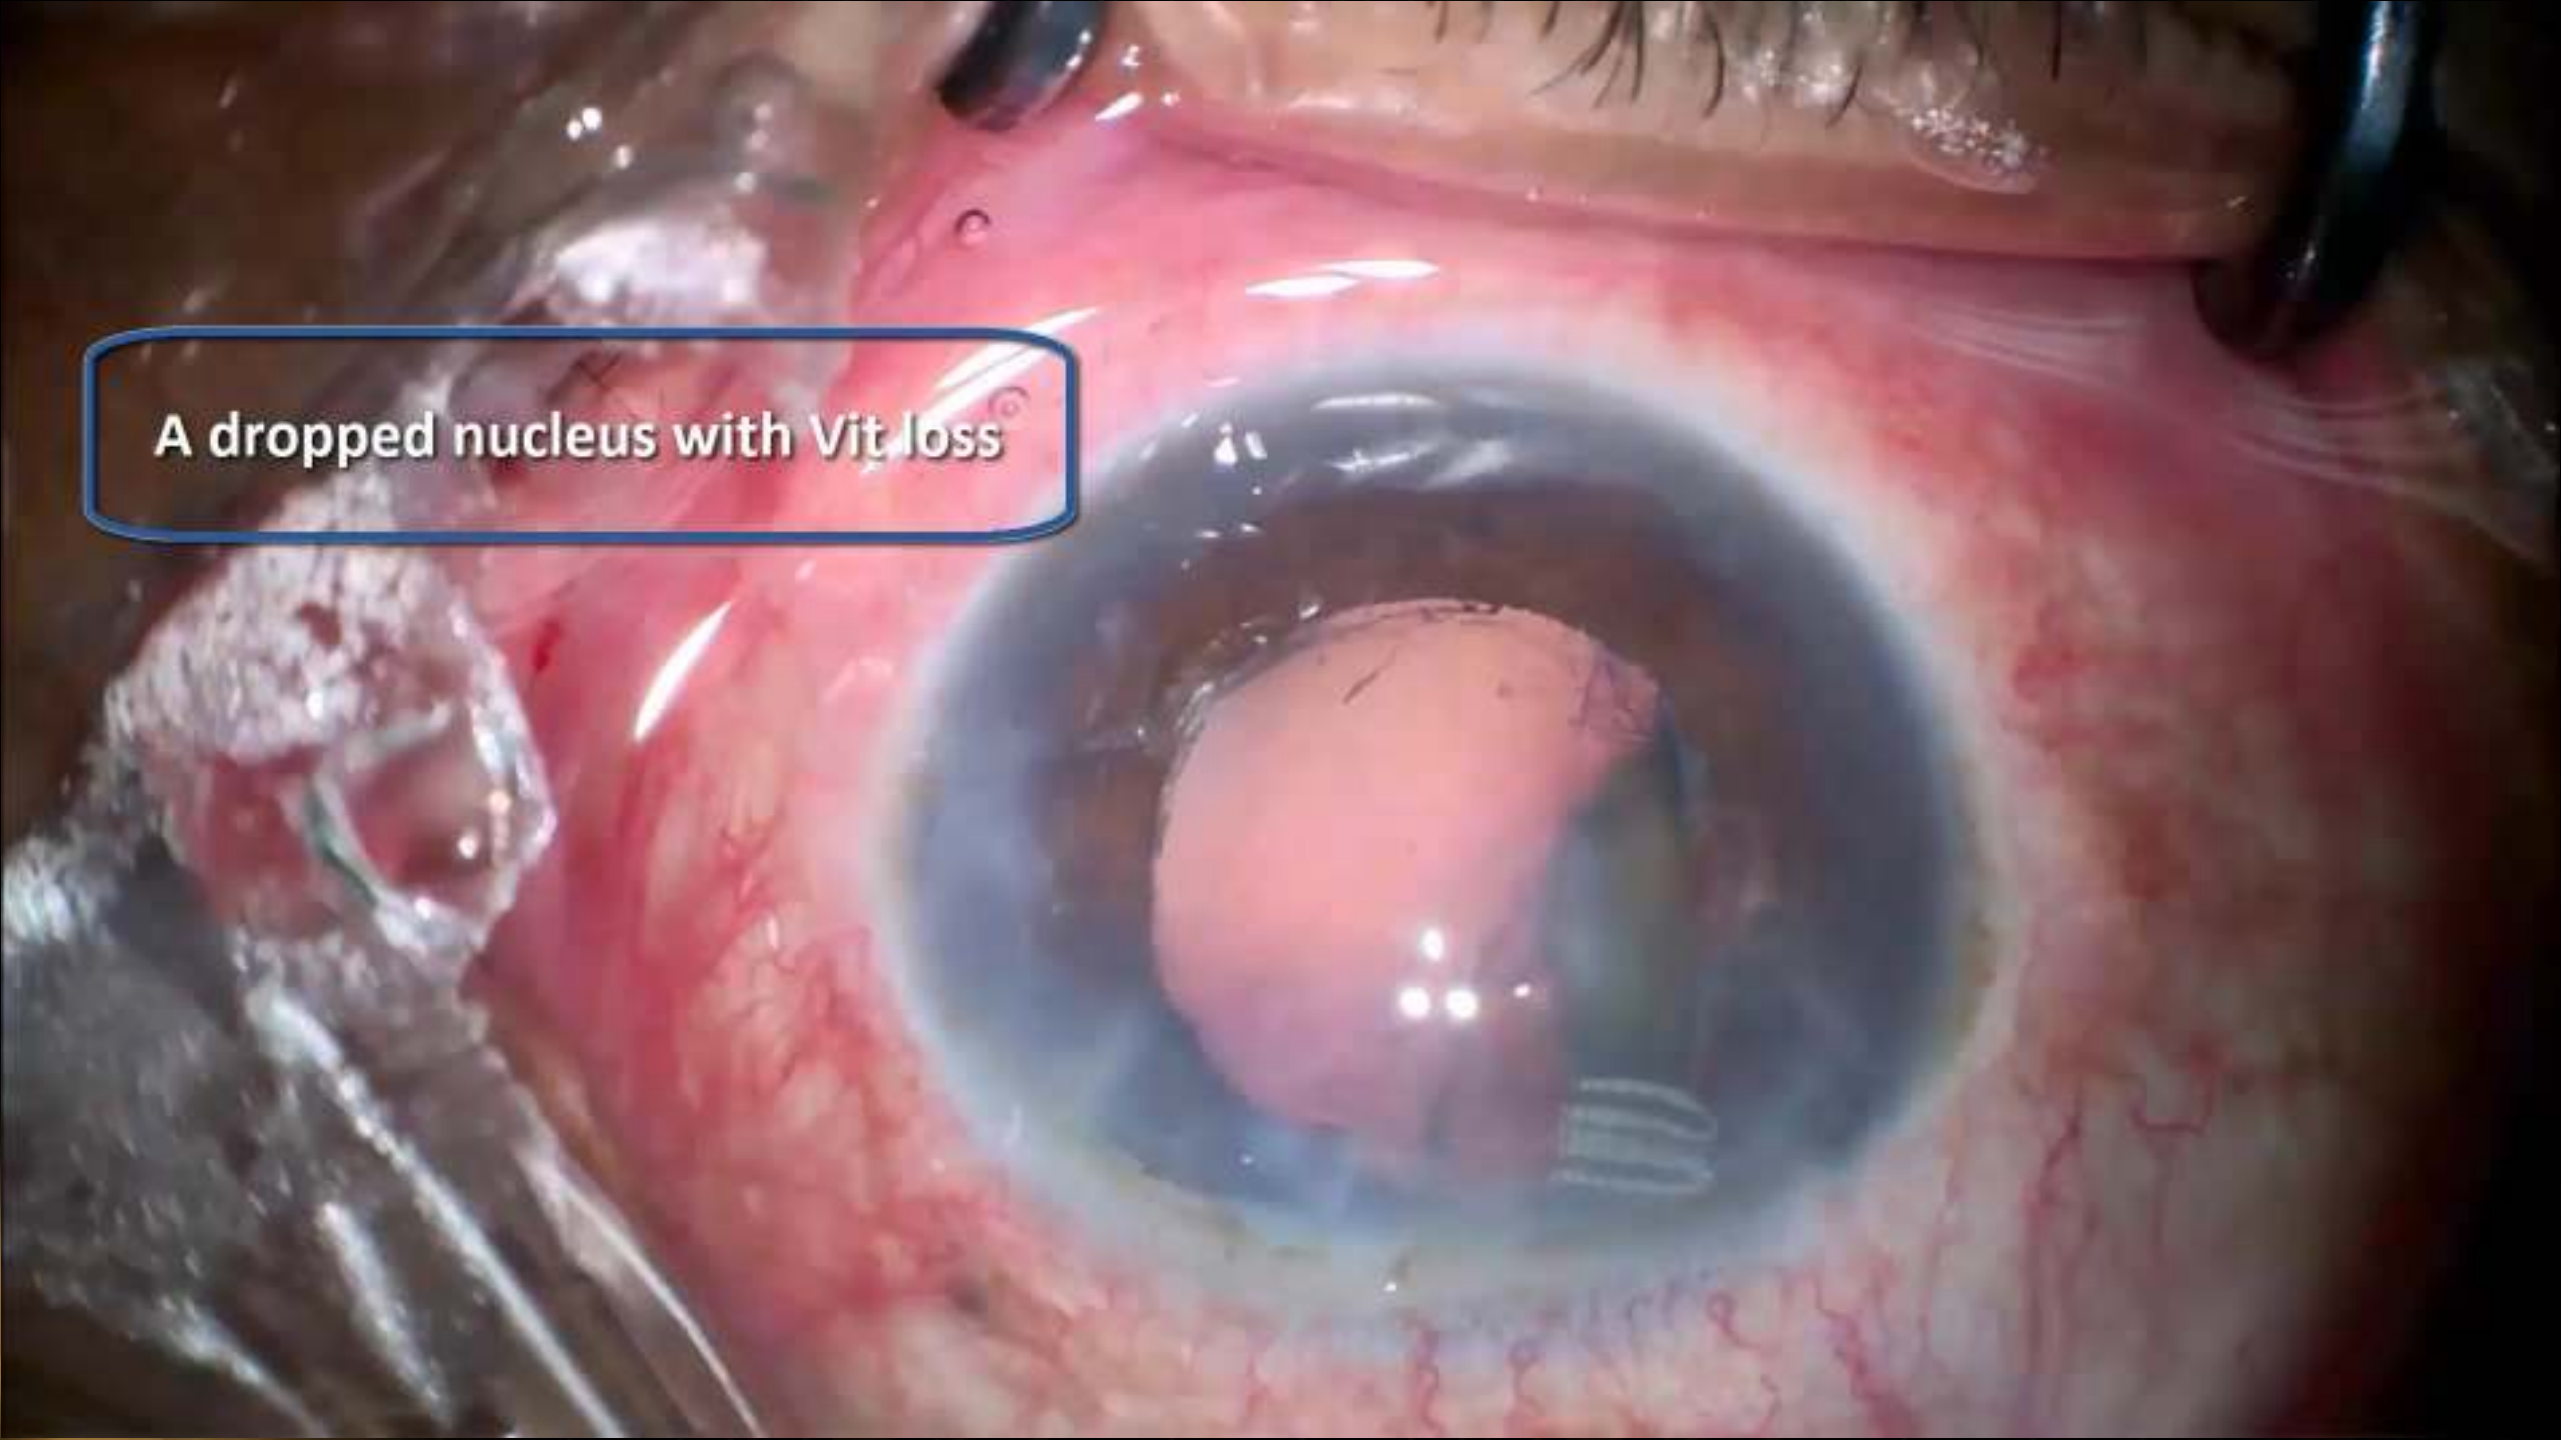

From the prospective of
Ant Vs Post Segment Surgeon

Prof Dr Wael El Gedy MD, FRCS, RFUM

Vitreoretinal consultan, MIOR

A dropped nucleus with Vit. loss

A dropped Nucleus is a posterior Segment Problem.

The take home Message:

- In a dropped nucleus, the complication is not the dropped nucleus.
- The complication is insisting on an anterior solution to a posterior problem.
- Stopping anterior manipulation early prevents irreversible damage.
- Complication from an anterior approach is not surgeon skill dependent, it is a flawed strategy.

Thank you
