The treatment of pain is a **Human Right**

Condition	No. Sufferers	Source
Chronic Pain	116 million Americans (>1.5 billion Worldwide)	Institute of Medicine of The National Academies
Diabetes	25.8 million Americans	American Diabetes Association
Coronary Heart Disease	16.3 million Americans	American Heart Association
Stroke	7.0 million Americans	American Heart Association
Cancer	11.9 million Americans	American Cancer Society

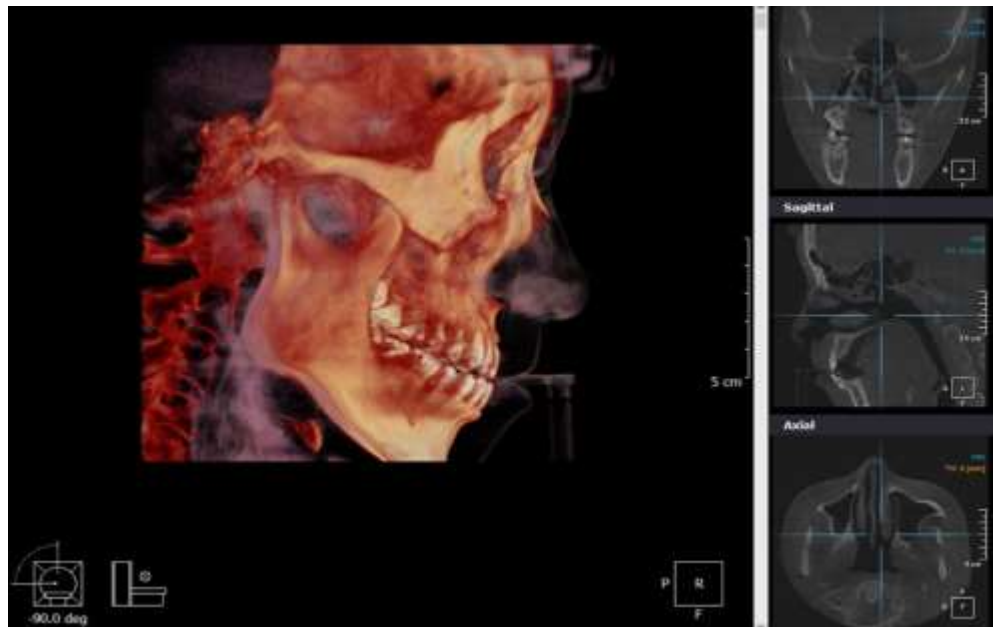

The Most Advanced Treatment for Orofacial Neuropathic Pain is PREVENTION

The knowledge of the Anatomy,
The knowledge of the different injectables,
Their mechanism of action and
The effects that they produce in the tissue.

A Correct Diagnosis:

Identify the damaged nerve
Identify neuromuscular damage

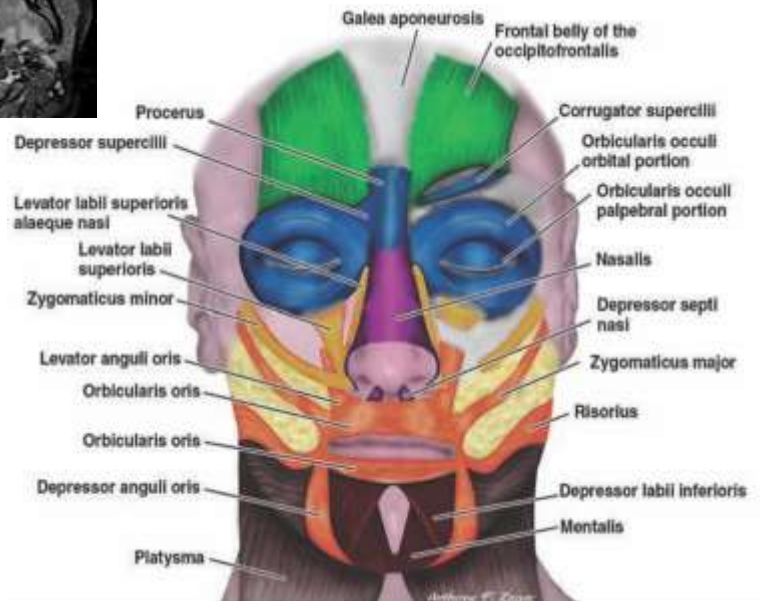

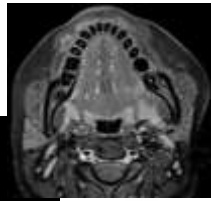

TAC

CADAVERIC COURSE

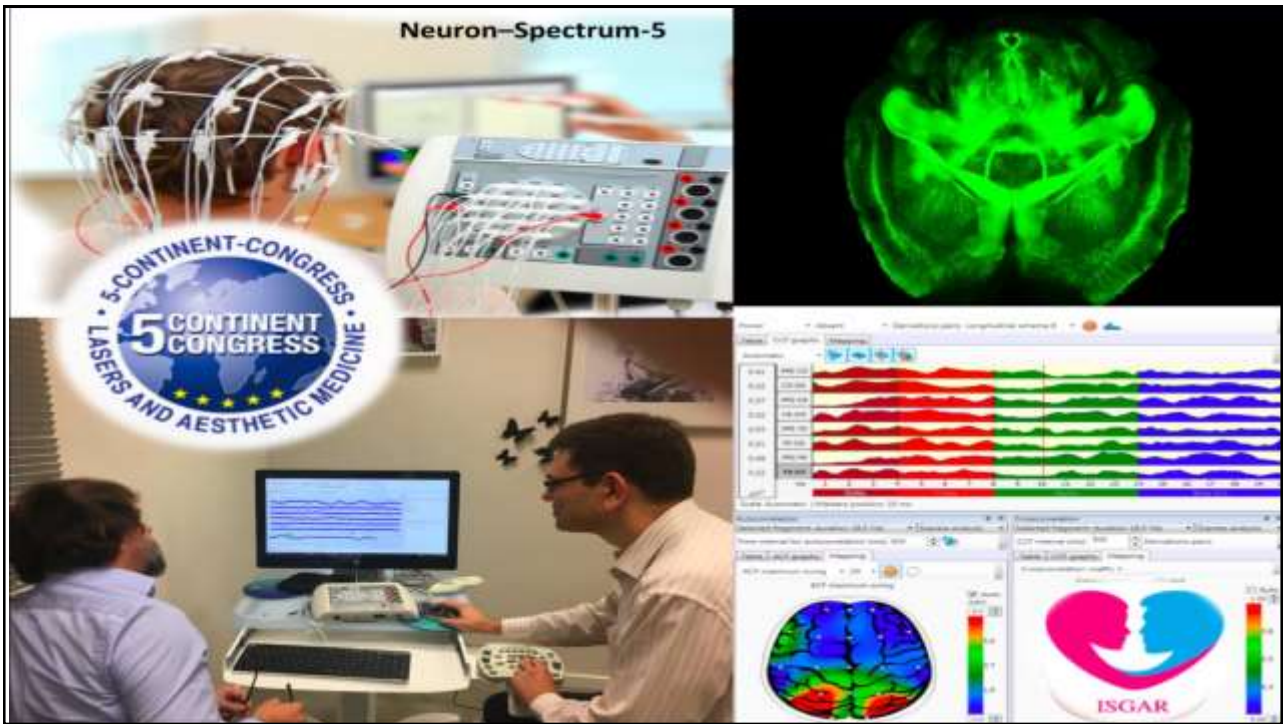

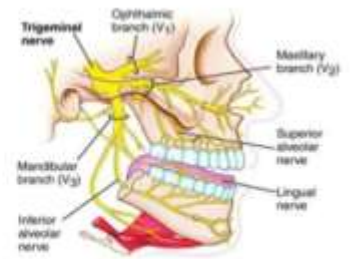

FACE MRI

CHRONIC NERVE DENERVATION

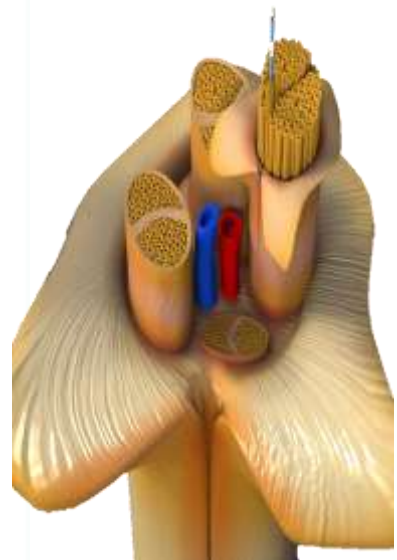

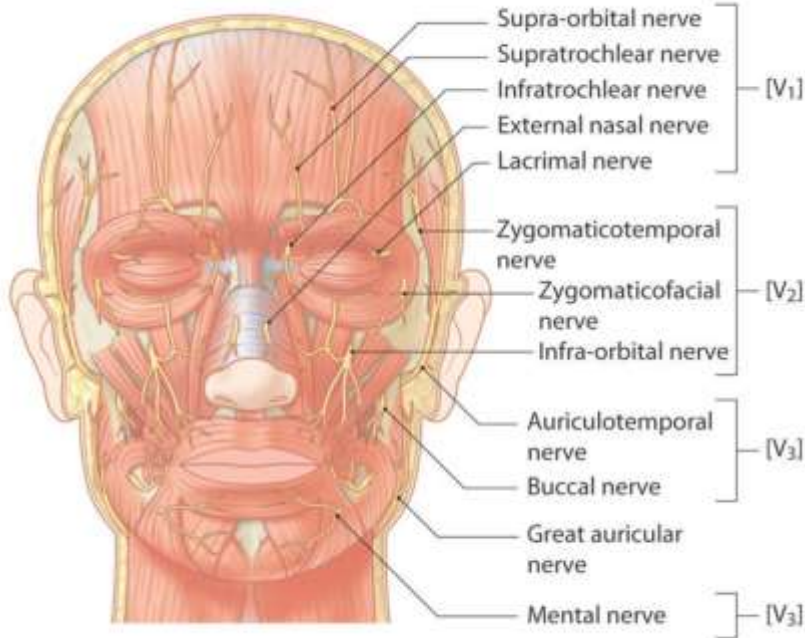

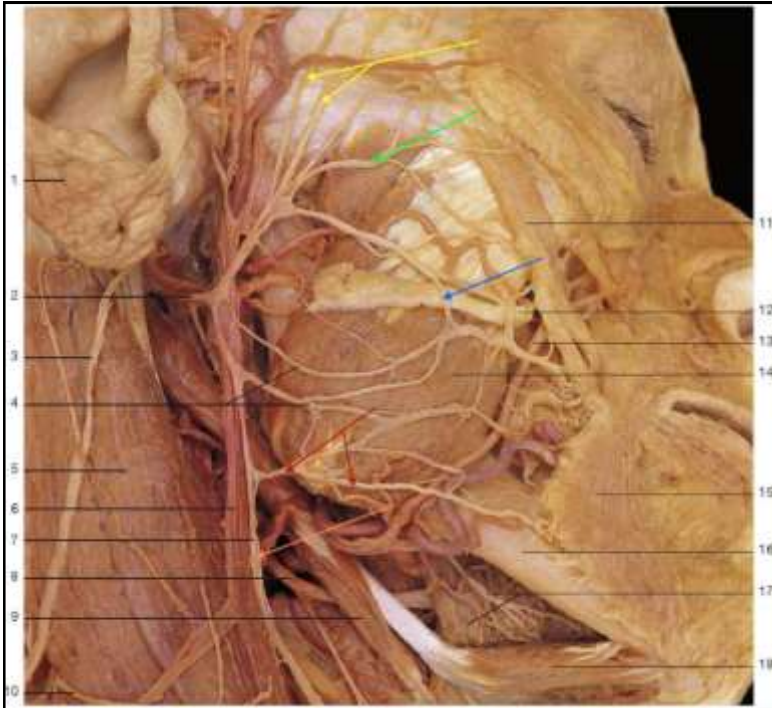

FACE : OROFACIAL PAIN AFTER AESTHETIC TREATMENTS

The price and risk of beauty

Dr. Cidrane

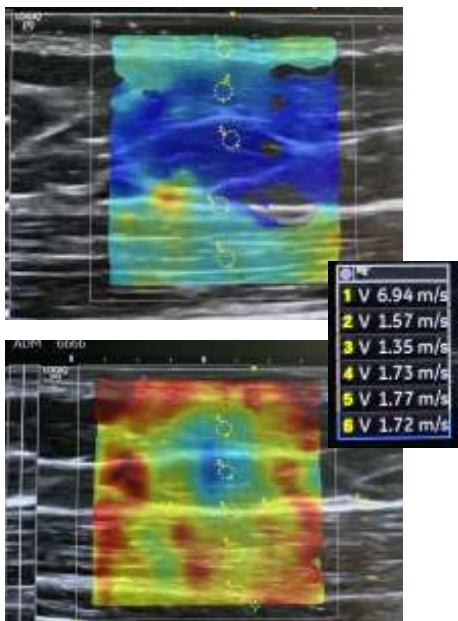

Edited image of lateral head dissection.

Note the facial nerve (2) and its 5 branches;

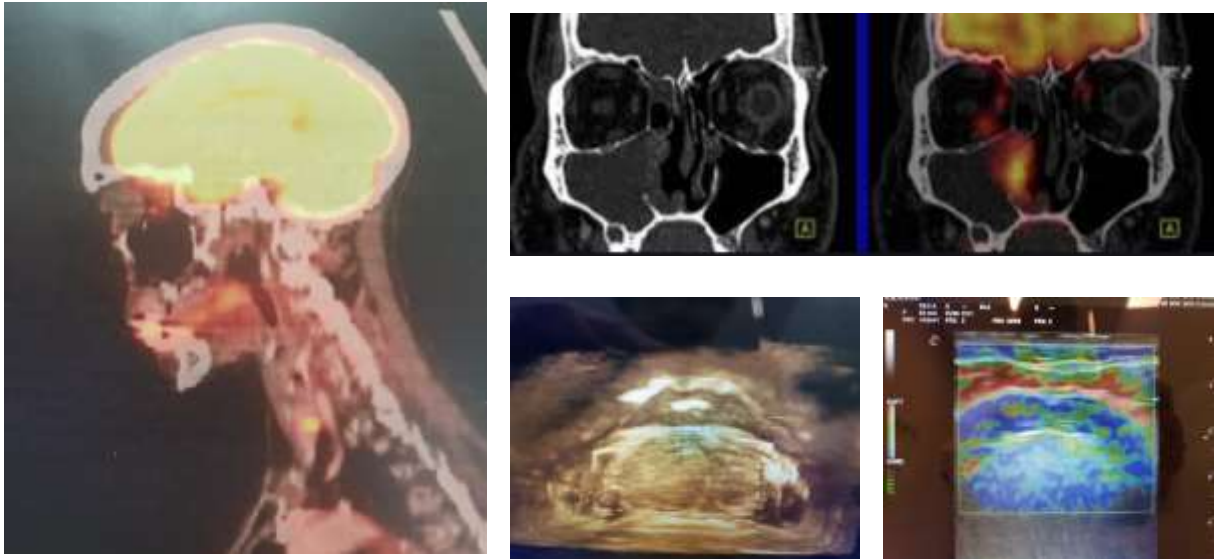

temporal (yellow arrows),
zygomatic (green arrow),
buccal (blue arrow),
marginal mandibular (red arrows),
and cervical (orange arrow).

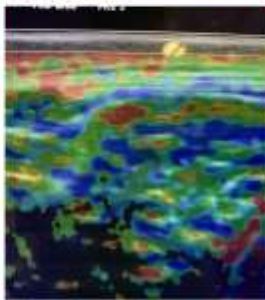

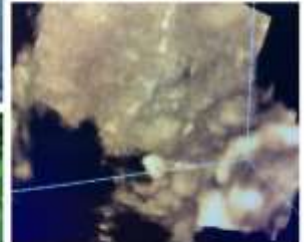

ELASTOGRAPHY

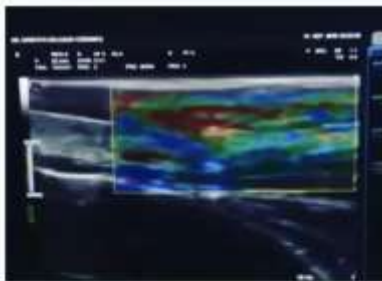

PET TAC / Metabolic Captation and Advanced Ultrasound

CRYOTHERAPY

Dexmedetomidine is an alpha 2 adrenergic receptor agonist

Peripheral nerve block
Buccal
Intranasal

1-2 mcg/kg

Lacosamide is a new antiepileptic drug effective 200 mg single dose

Deep transcranial magnetic stimulation

Brainsway Deep TMSIN my BRAIN

BRAINSWAY **CIMEG MADRID**

Protocol for Chronic Orofacial Pain

- 1- Motor threshold location**
- 2- Protocol Stimulation**

Power	120%
Frequency	18
Duration of trains	2 sec
Number of pulses by train	36 sec
Interval inter-trains	20 sec
Number of trains	55
Number of pulses by session	1980
Duration each session	20 m
Number of sessions	5/week
Number of weeks	4
Number of pulses by treatment	39.600

Bone Marrow Aspirate , BMA from Tibial Approach
